Online MCQ Test:

Clock:

There will be a timer which is updated in every second. And for each MCQ there will be 60 seconds. Finally it will automatically stop the program. And print the result.

Buttons:

1. Prev_Button:

To go to the previous question and if any question's answer is previously selected it will automatically ask the user that the answer is already selected.

2. Next_Button:

To go to the next question. And if the question length is over than the program will automatically stop and show the answer

3. Quit_Button:

It will stop the program and show the result.

4. Radio_Button:

For each option's like—

a)

b)

c)

d)

and the options will be like radio button

Display Results:

There will be Correct_Answer and Wrong_Answer and after that it will show the percentage of correct answer

Check Answer:

It will check the answer if the answer in the JSON file is in or not. If it is mapping the right answer than the answer will be updated by one.

Output:

0 8 53
